

#### Server:

- Server Operating System Installation: \$80 - \$320, this includes securing the server and setting up a software firewall, and SSH an Internet encryption protocol.
- Web Server: \$80 - \$160, this is highly dependent on the type of services you need available.
- E-Mail: \$80 - \$120
- FTP (File Transfer Protocol): \$80, this includes offering encryption
- VPN (Virtual Private Network): \$120 - \$200, this allows you to remotely log into your network as if you were there.
- Print Services: \$40, also your printer already has a network interface on it. We can configure it that way as well. It would still wind up taking about an hour.
- File Server for Windows: \$80 - \$120
- Security: \$99 Monthly fee

#### Operating System:

Depending on the operating system used, there are different charges:

- Fedora is free
- RedHat Enterprise, which is the operating system we suggest, is \$349 a year for updates, and support is \$995 for three years.
